## MERRELL ALL OUT TERRA TRAIL

### TESTER'S COMMENT:

"Despite concerns about the fit - particularly the inner sock - these were comfortable and supportive to run in. Used in mud, water and gravel path on which they gripped well. Submerged in water they felt comfortable to continue running in and my foot felt dry."

### EDITOR'S COMMENT:

It's imperative that trail shoes offer good support as well as keeping feet warm and dry, and our testers felt that the All Out Terra Trail delivered on all fronts. The inner sock provides a snug fit that moulds to the foot, keeping out any debris and leaving you free to enjoy an uninterrupted run.

## MERRELL ALL OUT TERRA TRAIL

### TESTER'S COMMENT:

"Very impressed by the amount of protection this shoe provides given how minimal it is. The Vibram sole provides a great fit and grip on all off-road surfaces, and the shoe's very lightweight. Superb grip, great fit and good construction."

### EDITOR'S COMMENT:

Trail shoes often compromise comfort for gnarly traction and durability. Fortunately, the All Out Terra Trail does not. Its glove-like fit makes hitting the trails a pleasure and the shoe will stand up to any obstacle your off-road pursuits may throw at you.
